OBJECTIVE

I am a Masters student seeking experience and applicable skills in industry. Interested in overcoming problems with team and self-oriented problem solving skills in industry setting. Focused on using AI and ML for current relevant industry applications.

EDUCATION

University of Washington (Current)	Graduating [TBD]
Master of Science in AI/ML for Engineering	GPA: N/A
University of Illinois Urbana-Champaign	Graduated [May, 2026]
Bachelor of Science in Physics - <u>Computational Physics Professional Track</u>	GPA: 3.78

Internships

Data Analyst @ IDX Exchange: Summer 2026

- Hands-on learning experience focused on analyzing real MLS (Real-estate) transaction data using Python and building market and competitive analytics dashboards in Tableau.

SKILLS

Programming: Python, SQL/Regex, Tensorflow/PyTorch, C++, Java; Github

Projects: (Python) - Have worked on [ML Hopfield Networks, Restricted Boltzmann Machines, and Generative Diffusion Models](#). Machine learning for classifying galaxies w/Galaxy Zoo; Built a quantum computing simulator and Shor's Algorithm; Fluid dynamic simulation w/obstacle that simulated flow of fluids w/collision in a 2D tube; Markov Chain simulations.

Experiments: I worked with a partner and instructor to set up, execute, analyse and report on modern physics projects including observing relaxation times with NMR, recreating quantum entanglement and violating the CHSH Bell Inequality, observing muon behavior entering the surface of Earth, and analyze ferroelectric materials.

Leadership/Project Planning: Have experience leading special events for church youth group - spearheaded a retreat murder mystery for 200 kids including coordination with camp leaders for time, equipment, resources etc. Also worked to revive my Boy Scout troop due to Covid-19 as a new attendee, worked with a mentor to learn the structure and workings of a troop and lead the troop as the only older scout. For my Eagle Project I proposed and executed the design and construction of 4 bulletin boards and installation on church stairwell walls. I also managed the funding and money that was required for the project.

Other: Soldering, Woodworking, Word/Excel, **Languages:** English, Mandarin

EXTRACURRICULARS

Physics Mentor: Volunteered to be a mentor to freshmen at UIUC, helps with their 4 year plan and acclimating to college life.

Venturing Crew: Scouting Program - Leads national week-long adventures such as Summit (June 2022), Northern Tier (Feb 2023), and Florida Sea Base (Dec 2025).
